

## LEARNING STYLES – HOMEWORK TIPS

<p><b>Kinesthetic Learner</b>  <b>Your child learns by doing and touching</b></p>	<p>When reading have your child track words on a page with his/her finger          Have your child write information down multiple times to help them memorize          When reading, have your child highlight and underline important facts, information or new vocabulary words          Have your child play with a stress ball, play dough etc. while studying          Have your child take frequent breaks by moving around          Provide learning opportunities for hands-on activities, such as building models or designing games</p>
<p><b>Visual Learner</b>  <b>Your child learns new information by reading and looking at graphs/charts or watching demonstrations</b></p>	<p>Have your child make and use flash cards, index cards, cheat sheets for review          Have your child use charts, tables, and maps to reinforce concepts          Have your child use graphic organizers to organize thoughts and ideas          Have your child draw illustrations, maps, charts, diagrams          Have your child highlight and underline and colour code information</p>
<p><b>Auditory Learner</b>  <b>Your child prefers to listen than to read and often studies by reciting information aloud</b></p>	<p>Have your child talk about and explain what they are learning          Have your child recite important information aloud, maybe recording it and playing it back          Have your child read a book and listen to the audio book at the same time          Have your child set facts and information to familiar tunes or create raps to help remember new content more easily          Limit noise that could distract your child</p>
